

NIBIO

NORWEGIAN INSTITUTE OF
BIOECONOMY RESEARCH

Multi-disciplinary activities focused on
food security, environment and climate change

Thematic areas:

- Plant health
(diagnostics, biology, ecology and management)
- Biological resources from soil, plants, forests and land
- Socio-economic analysis.

New project about measures against invasive alien plants?

Wiktoria Kaczmarek-Derda

Division of Biotechnology and Plant Health
Department Invertebrate Pests and Weeds

Research areas

- Invasive alien plants and quarantine species
- Weed biology, ecology and management

Current project

BIOIMMIGRANTS – Innovative approaches and technologies to manage invasive alien species threatening biobased production

- New molecular identification methods
- Innovative control measures
