

WARSAW
UNIVERSITY
OF LIFE SCIENCES

International Joint Degree Master Programme

Warsaw University of Life Sciences (SGGW) and
Kazakh National Agrarian Research University
(KazNARU) offer studies Polish-KAZakh International
Joint Master in Environmental Engineering:

**MODERN ENGINEERING
IN WATER MANAGEMENT.**

Join our Master Programme
summer semester 2021
(at the beginning of March 2021).

Get a scholarship to travel to Kazakhstan!

Admission Starts:

DECEMBER 21, 2020

This programme is a joint initiative of two Universities supported by funding from the Polish National Agency of Academic Exchange. Giving the possibility of creating a unique international programme combining lectures organised in Poland and Kazakhstan.

During this programme you can apply for:

- * scholarship
- * intercultural workshops
- * professional English language course

Aim of the study:

The Faculty of Civil and Environmental Engineering at SGGW, will launch the new international studies "Modern engineering in water management". The study starts 1st of March 2021. The Faculty of Civil and Environmental Engineering has the aim to offer the students holistic and interdisciplinary knowledge in the area of water management and environmental engineering. Specialists from different faculties of Warsaw University of Life Sciences (SGGW) and visiting professors from abroad will present the contents. Studies are focused on both

technical and ecological aspects of the environment, emphasizing the role of the human in shaping sustainable landscapes and ecosystems. Specifically, students obtain a complex knowledge of the integral approach in water management in the age of environmental droughts and climate change. The programme is divided into three semesters. It consists of lectures, seminars, workshops, labworks, and field research conducted in both partner countries: Poland and Kazakhstan.

SGGW is a life sciences university. Our research and teaching activities focus primarily on issues related to agriculture, biology, horticulture, food and nutrition, forestry, veterinary medicine as well as disciplines that strongly support life sciences, such as economics, social sciences, computer science, technology, and engineering. We offer 38 study programmes in Polish and several degree programs taught exclusively in English.

SGGW provides excellent living conditions as well as modern scientific and didactic facilities comparable to the best life sciences universities in Europe. More than 4000 dormitory places are available. Comfortable suites surrounded by various social facilities are perfect to meet the needs of international and domestic students. SGGW campus is one of the best organised facilities of this type in Poland, from which in 15 minutes you can reach downtown Warsaw – capital city and the largest academic center in Poland comprising a unique combination of science and business, well connected to many European cities. Thanks to its location in a green part of the city – Ursynów, you can live, learn and spend time in one place. Swimming pool, sports halls, lawns are where students do sport and integrate. Our biggest pride is being awarded by international students with the title of a student-friendly university. Find friends for life in seminar groups, academic circles and student organisations – after all, shared passion connects the most.

Detailed programme of studies

During the MSc programme students study at two universities. Courses offered in the first semester are organised in three modules

- 1-month join online module
- 3-months stationary module in Kazakhstan (scholarships paid by NAWA)
- Field research module part 1 (Drought and deserts in Kazakhstan). The second and third semesters are in Poland and include obligatory and elective courses: intercultural workshop in the Tatra mountains; field research module part 2 (Drought and wetlands in Poland); master thesis.
