Resistine

# Real Difference

AI CyberSecurity Assistant

[www.resistine.com](http://www.resistine.com)

TLP:GREEN

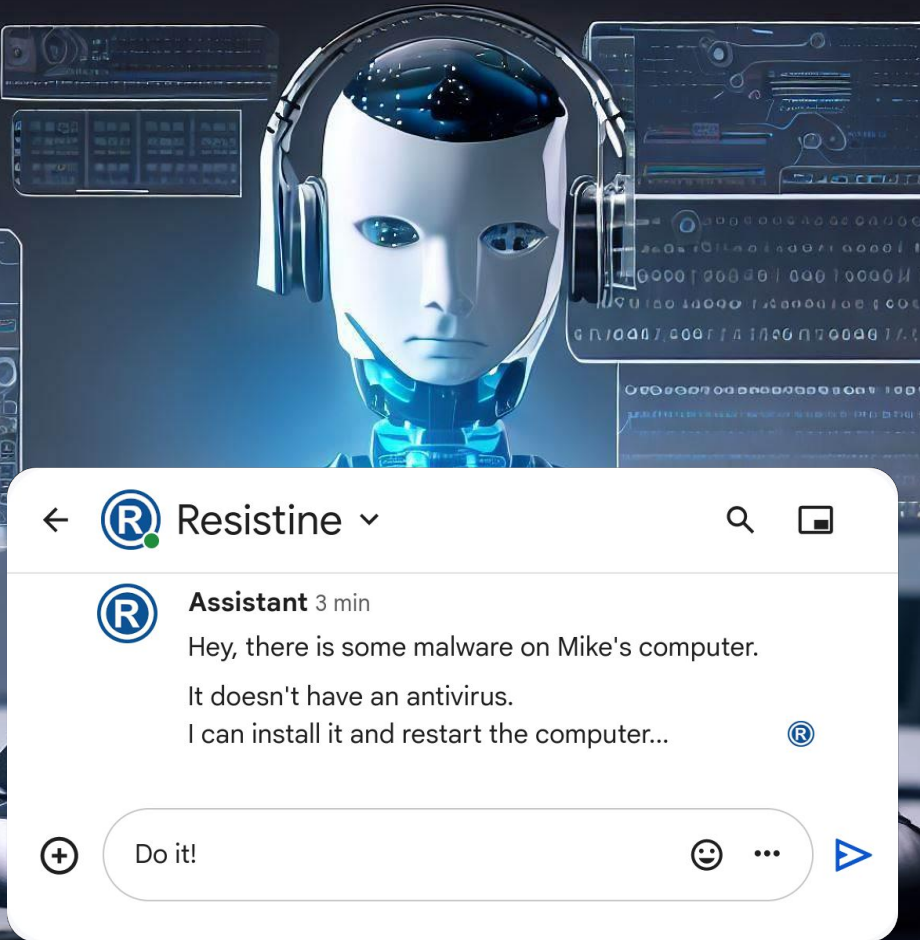

## How it works?

### The Open Source AI Cyber-Assistant XDR

- detects Vulnerabilities and Advanced Persistent Threats
- suggests solutions and
- communicates with everyone to provide training and

to improve cybersecurity according to NIS2, DORA and eventually NIST2 (US).

The easy to understand and implement **chat interface** enables companies with limited resources or expertise to achieve enterprise-level security.

## Difference

Open-source allows affordable solutions, customers will get an **unparalleled level of security for their money**.

Resistine values data privacy and sovereignty, so customers don't need to send their sensitive data anywhere.

**Our competitors target large customers** and leave behind the smaller ones with limited cyber expertise and budget.

**CyberSecurity is everyone's business**, so we communicate with all employees.

Customizable reports for NIS2 authorities

# Competition?

## OpenAI

created a closed model for Cisco and ...

## Microsoft

Security Copilot used by

- IBM cancelled own solution
- CrowdStrike caused Armageddon

available since April 2024

Google will provide Gemini for

- Palo Alto Networks

no information on availability yet

There is no European competition so far

Do you really want your cyber-security to rely on **Microsoft**?

... their Windows and clouds?

And take part in the global IT Armageddon?

**Resistine** is a real difference.

# Price of Bringing CyberSecurity to AI

Microsoft using  
ChatGPT in  
Bing and Copilot

0\$

per month

OpenAI using  
ChatGPT in  
other GPTs

20\$

per month

Microsoft using ChatGPT  
in  
CyberSecurity Copilot

3000\$

per month

# CyberSecurity as a Service

End-point Detection and  
Response

**EDR**

**4 €**

per device/month

- Win/Lin/Mac protection
  - AI chat interface
  - Slack integration
- Cloud deployment
- Start with free trial

eXtended Detection and  
Response

**XDR**

**8 €**

per device/month

- Includes EDR package
  - Network protection
    - Multiple chats
- Includes secure router
- Minimum 1 year contract

Managed Detection and  
Response

**MDR**

**Custom**

tailored for the business

- Includes XDR package
  - Custom deployment
  - Custom integrations
    - Custom chats
- Custom services

If you are a start-up, non-profit for public good or located in Ukraine or Africa, please contact us.

# The founder?

20 years in AI, Petr was a researcher at the faculty where Large Language Models (LLMs) spoke for the first time.

During this time, he excelled in AI and got top honors in multiple NIST Challenges, NVIDIA or AWS AI challenges...

He was monitoring NATO CCDCOE exercises.

Petr is an entrepreneur since 2001, raised €3 million (mostly grants) and created a cybersecurity company recognized by Gartner, Forbes and big Four, he is actually exiting ...

**GREYCORTEX**

# Resistine Team

Consists of 14 people working together for up to 2 years or even before

**Petr**

Founder | 4 startups

**Alice\***

Marketing | 3 startups

**Milan**

Sales | ESA, Deloitte

**Claudia**

Marketing | Nokia, Juniper

**Francis**

Manager | IT Enterprises

**David**

Web Security | university

**Rosta**

AI R&D | university

**Peta**

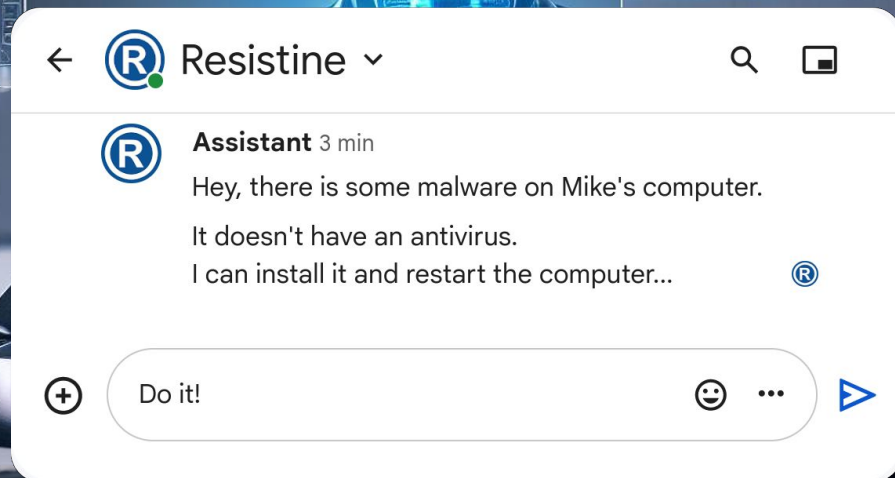

Cyber | Accenture

# Ideas

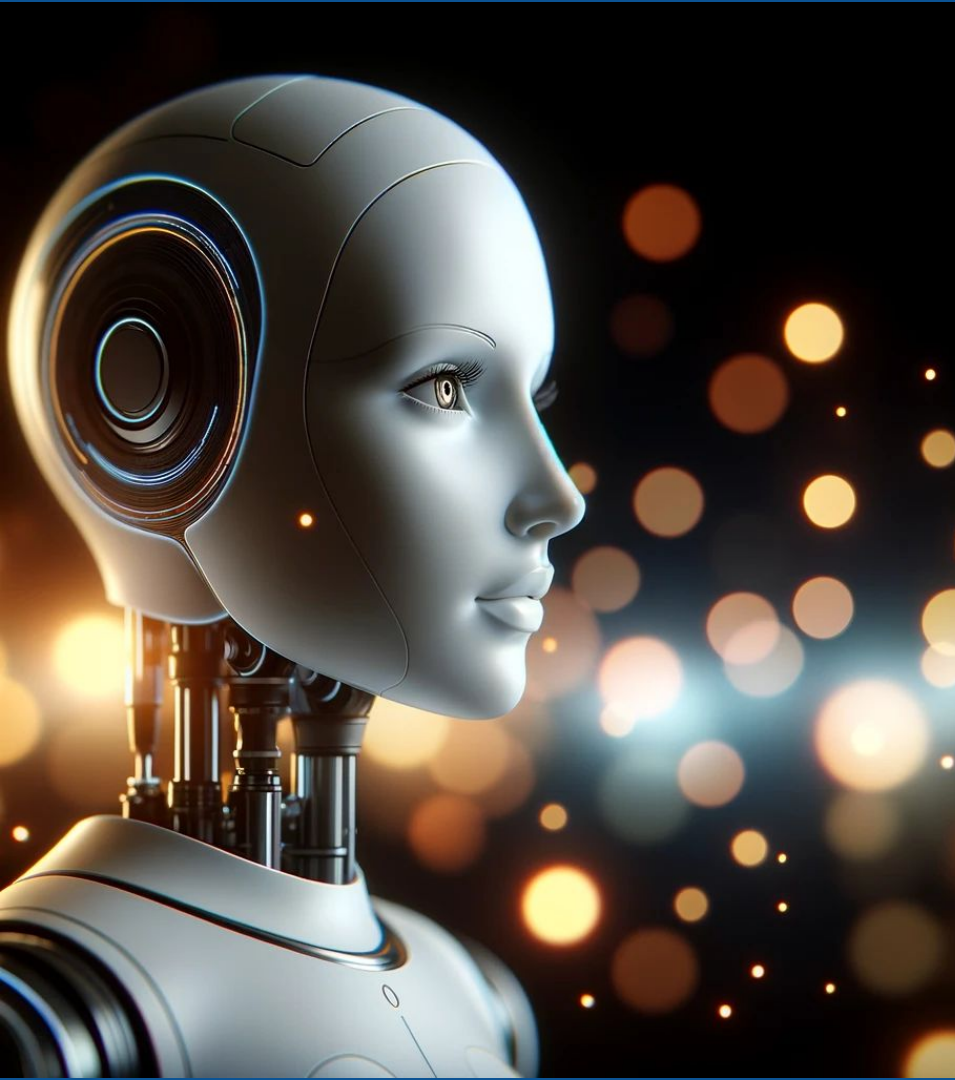

**Research idea:** To learn from each SOC click!  
so that SOC analysts have a meaning of life  
either to share it or not using eg. MISP

**ECCC idea:** To provide open source security  
with universities for those who need it the most

Resistine offers free software and services  
to universities, critical startups, nonprofits for  
public good and located in Ukraine and Africa

# Resistine

looking for partners

to make the world **safer and more free**
