17:30	Wrap-up and closing	Open discourse space	Focal point: Host and EuroDIG Team	

EuroDIG 2014 – consolidated program outline

(based on proposals received, Online voting and debates in Berlin and Geneva)

Remarks:

The above selection of key topics and proposed main sessions is based on reflections of challenges on the European agenda. Other specialized themes are important but should be covered in side sessions like Flashes and other formats. This 2nd program outline for EuroDIG 2014 tries its best to consider the impressive number of more than 90 proposals (received until end of 2013), the online voting and vivid debates on key issues and topical priorities during the open planning meetings end of January in Berlin and Geneva in February.

This consolidated program still needs more specifications and tuned focus. Session titles are still working titles – except for the session on the over-arching theme “*Digital society at stake – Europe and the future of the Internet*”. This fine-tuning on titles, focus, related questions, suggestion and selection of panellists etc. needs to be accomplished by the organizing teams (submitters of related proposals – see numbers of related proposals). To further promote an inclusive process on session elaborations, EuroDIG offers a new WIKI and working tool for the organizers – see: <http://www.eurodig.org/news/eurodig-wiki> and http://www.eurodig.org/wiki/Main_Page

The follow-up and further elaboration of sessions and formats will be a coordinated effort between the focal points (with their respective org. teams) and the EuroDIG Program Director in collaboration with the core team and the host. This effort will be supported by a team of digital facilitators, which help organisers to collaboratively shape a session by using the WIKI.

A final program version for Berlin 2014 needs to be accomplished by end of March and before the registration process will start.

Thanks for your comments and further inputs!

Leipzig / Lisbon, March 2014
