**mkm PERFEKT Sp. z o.o.**  
**1. Rzemieśnicza Street**  
**30-363 Cracow**

In reference to your note dated 04/11/2015 (reception date: 04/14/2014, ref. no.: 973/14) on the issuance of a conservator's opinion for the works associated with the Contract titled: "Expansion of Flood Embankments and Construction of the Right Embankment of the River Biała in Tuchów, Tarnów, City of Tarnów", the Provincial Authorities for Heritage Protection – Office in Tarnów informs that – based upon an archival query – the following was identified:

1. The course of the Contract in question within the Commune of Tuchów (section 0+000-0+810, 0+000-0+900) is located within an area containing numerous archaeological stations, which remain registered objects under conservator's protection, as results from the Act of July 23, 2003 on the protection of heritage and the care for heritage. **It is therefore necessary to perform any earthworks within that section under archaeological supervision.**
2. One shall especially consider the railway gatehouse (Kassali Street) at the railway bridge over River Biała (section 0+000-0+060). It is an object of an exceptional historic value, and a procedure of entering it into the heritage register for the Małopolskie Province has already been commenced.
3. Remnants of the old bridge (abutments) placed at Kwiatkowskiego Street (section 2+956-3+120) shall be kept.

We simultaneously remind about provision of Article 33 of the Act of July 23, 2003 on the protection of heritage and the care for heritage, which states that *The one who found an item, which may be considered as an archaeological finding, is obliged to protect that item using available resources and to mark the place of finding, and immediately notify about the finding the proper provincial heritage conservator; and – if it is not possible – the proper commune administrator (town clerk, mayor).*
