RE: Decision on environmental conditions dated 11/30/2015, ref. no.: ST-I.4210.1.2015.BM, for the Works Contract including Construction of the right embankment of the Biala River in the City of Tarnów at local chainage of km 0+000 – 0+695, according to option “2”.

In reference to the note dated 04/10/2017, ref. no.: BTT-307/MJ/2017, the Site Issues Department in Tarnów of the Regional Directorate for Environmental Protection in Cracow informs that due to a condition determined in item III.1 of the decision of the Regional Director for Environmental Protection in Cracow dated 11/30/2016, ref. no.: ST-I.4210.1.2015.BM. *“Implementation of the Works Contract shall be synchronized with the construction of the left flood embankment at chainage about km 6+680 – 7+700 of the River Biała, so (through the development of the subject / developed embankment) flood hazard for the Koszyckie Estate in Tarnów would not increase”* – in the construction design for the Works Contract comprising Construction of the right embankment of the Biala River in the City of Tarnów at local chainage of km 0+000 – 0+695, according to option “2”, one shall consider accumulated impact of both contracts, i.e.:

1. Hydraulic calculations remaining a basis for adoption of design solutions shall finally include both: construction of the left embankment and the right embankment for the River Biała, as well as extension of the existing embankments.
2. Although the Works Contract related to the Construction of the right embankment of the Biala River in the City of Tarnów at local chainage of km 0+000 – 0+695 may operate on its own, in accordance with its purpose – flood protection for the right-bank part of the City of Tarnów (it shall remain a closure for two existing sections of embankment), the construction design shall indicate a necessity of constructing a left embankment within the Koszyckie Estate.
4. The construction design shall contain all necessary opinions, decisions, and establishments, including e.g. a standpoint of the Regional Water Management Authority in Cracow on implementation of the Works Contract in question in its current form, including agreement on the developed hydraulic model.

pp. Regional Director
for Environmental Protection in Cracow
Eng. Paweł Koziół MSc
Manager of Site Issues Department in Tarnów
