

Invitation to partnership in the project "Supporting the transition of Ukraine to a circular economy for green reconstruction" for participation in an open competition from the European Commission regarding the Environment and Climate Action Program (LIFE) on the topic of environmental governance "Circular economy and quality of life - Standard action projects (environmental management)".

Partner network of Ukrainian organizations: "Living Planet" NGO, Ukrainian public organization "Association of Small Cities of Ukraine", Confederation of Builders of Ukraine (representative of Ukraine in the Federation of the European Construction Industry (FIEC)), "Eco Generation" NGO, is looking for a European partner in order to create an international Consortium.

The network has many years of experience in the development and promotion of the implementation of green and circular economy tools, in the implementation of eco-design, energy and environmental labeling of energy-consuming products, in the promotion of the development of green markets in various sectors of the economy, in research on achieving the goals of the EU GD together with SEI, in strengthening institutional capacity local self-government bodies, promotion of green and economic development of small towns, implementation of programs of energy-efficient and green building, as well as in international communications and communications on environmental safety.

Within the framework of this project, activities focused on the EU Green Deal, the New circular economy action plan (CEAP), Ukraine Facility Plan, the Strategy of Sustainable Development of Ukraine until 2030, the project of the National Waste Management Plan of Ukraine until 2033 are planned:

- support for decision-making by state administrations and voluntary approaches aimed at strengthening European integration and recovery of Ukraine;

- strengthening the capacity of state administration bodies and communities to implement, in partnership with public organizations and business, strategic documents and action plans regarding waste management and the transition to a circular economy model;
- development, promotion and implementation of voluntary tools and approaches aimed at reducing the impact on the environment, in particular innovative business models to promote the use of recovered materials in construction (including demolition waste), including the application of PEFCR/OEFSR, ecolabel standards and sustainable building, green and circular public procurement.

If you are interested in discussing a project concept to join this work, given your experience in implementing circular economy programs and your recent research on this topic, we are honored to invite you to join our team as a Senior/Lead/Principal Partner.

With gratitude for your attention and best wishes,

National Coordinator of the EU LIFE Program in Ukraine

Viktor Bukovynskyi
