### ATM of ST debt

In June 2020 the average time to maturity (ATM) of the ST debt amounted to 4.82 years (i.e. fell by 0.04 year m/m and fell by 0.15 year as compared to the end of 2019), remaining in line with the debt management strategy, i.e. close to 5 years. The ATM of the domestic debt amounted to 4.39 years, i.e. it fell by 0.03 year m/m (mainly due to switching auction and debt aging) and fell by 0.15 years compared to the end of 2019. The ATM of the domestic debt remained close to 4.5 years which is in compliance with the debt management strategy. In June 2020 the ATM of the foreign debt fell by 0.07 year m/m and rose by 0.03 year compared to the end of 2019 remaining at a safe level of 6.09 years.

### ATR of ST debt

In June 2020 the average time to re-fixing (ATR) of the ST debt amounted to 3.69 years (i.e. fell by 0.05 pp m/m and rose by 0.04 year as compared to the end of 2019). The ATR level in June was a result of the decrease in the ATR of the domestic debt, which amounted to 3.29 years (by 0.05 year m/m) and the decrease in the ATR of the foreign debt, which amounted to 4.86 years (by 0.06 year m/m). The levels of the ATR resulted from changes in the ATM and the share of floating rate instruments. The ATR of the domestic debt remained within range of 2.8-3.6 years assumed in the public debt management strategy.

### Duration\* of ST debt

In June 2020 the duration of the ST debt amounted to 3.64 years (i.e. fell by 0.03 year m/m and rose by 0.06 year as compared to the end of 2019). The level of duration was a result of the decrease in duration of the domestic debt (by 0.04 years m/m to 3.21 years) and no change of the duration of the foreign debt (4.85 years). The changes in the duration resulted mainly from changes in interest rates level and the ATR. The levels of the ATR, as well as the duration, indicated that the interest rate risk of the ST debt remained stable.

### ATM and duration\* of domestic ST debt by group of investors

At the end of June 2020 the ATM and the duration of the portfolio of the domestic TS held by foreign investors amounted to 5.06 years (-0.06 years m/m) and 4.98 years (-0.06 years m/m) respectively. The ATM and the duration of the domestic non-banking sector TS portfolio amounted to 4.52 years (+0.01 year m/m) and 3.27 years (-0.03 years m/m), respectively. The ATM and the duration of the TS portfolio held by the domestic banking sector amounted to 4.12 years and (-0.04 years m/m) and 2.76 years (-0.03 years m/m), respectively.
