

# NORWEGIAN - POLISH FOUNDATION

An instrument for developing Norwegian and Polish interest

We would like to be an active partner to create a win / win situation

Together with our polish partner we offer assistance to Polish interest to apply for programs connected to EEA and Norwegian Grants, including help to find a Norwegian Partner.

This gives the application maximum points and help Norwegians interest to access a new market, which would be challenging for them to do by them self

# NORWEGIAN - POLISH FOUNDATION

An instrument for developing Norwegian and Polish interest

Beside general assistance, we focus specially in area which develop sustainable energy solutions, climate and life quality improvement. Ongoing projects / products are:

- Develop and offer New Fuel for replacing coal for heating and hot water  
(Bio Pellets – Pellets Production Line – Pellets Boiler)
- Start pilots for Zero emission Transport  
(Autonomous Mobility – Hydrogen as fuel – developed form different sources)
- Offer Products and technology for gas and odour cleaning to immediate get effect  
(Power plants, industry etc Nox, Sox,)
