No. ZP.011.45.2018 Signature: *Krzosek*

Subject: Depositing of spoil from the designed dredging works in the Klucz - Ustowo ditch on the dump fields of the Maritime Office in Szczecin.

In response to the letter of 18.04.2018 ref. no. POPDOW-ZP.010.21.2018, the Maritime Office in Szczecin informs that it agrees to the paid storage of increased amount of spoil as a part of the projects:

- construction of a mooring and berthing base for icebreakers in Podjuchy – 15 000,00 m³,
- dredging works on the fairway of the Klucz - Ustowo ditch – 45 000,00 m³

The conditions specified in the letter DBM-II-074/4/2/17 and the conditions included in the Water Law Act permit for the Mańków silting field shall remain in force.

The Office also requires an earlier agreement on the date of carrying out the depositing of the above mentioned spoil in order to coordinate own works.

The cost of 1m³ of the deposit will be recalculated prior to the commencement of your works. It will be updated with the costs of expenditures incurred to adapt the dump field to the spoil deposit in the years 2017 - 2018.

The Maritime Office in Szczecin also requires the payment of an advance payment of 50% of the whole task. The advance payment will be used to secure and prepare the silting field to receive the increased amount of spoil from the dredging works from the above mentioned tasks.

[handwriting and stamp]:

Yours faithfully,

DIRECTOR

Of the Maritime Office in Szczecin
