

Norwegian Institute for Nature Research

Jørgen Rosvold

Deputy Head of Research, NINA

Email: jorgen.rosvold@nina.no

Norway's leading research institution in the field of nature

- The Norwegian Institute for Nature Research, NINA, is an independent research foundation focusing on nature, and the interaction between nature and human society.
- Spanning terrestrial, freshwater and coastal ecosystems
- NINA is Norway's leading institution for applied ecological research, with a long-standing global reach
- Multi-disciplinary expertise; biologists, geographers, economists, sociologists, anthropologists and more
- Conducting science of high scientific quality and integrity
- Delivering knowledge for environmental management and policy development

Key fields of expertise

- Ecosystems, biodiversity and ecosystem services
- Sustainable use and harvesting of natural resources
- Environmental mapping and monitoring
- Climate change impacts and adaptation
- Renewable energy – hydro and wind power
- Environmental impact assessment processes connected to infrastructure development and land-use changes
- Restoration of degraded land and ecosystems
- Land-use and landscape analysis, green/blue infrastructure
- Invasive and threatened species
- Coexistence and sustainable land-use in multi-use landscapes
- Human interactions with their natural environment

Cooperation and expertise for a sustainable future
