Program LIFE

Cele programu
Podstawowa logika projektów

Cel podprogramu LIFE CET

Narodowy Fundusz
Ochrony Środowiska
i Gospodarki Wodnej

- a) **opracowywanie, demonstrowanie i promowanie innowacyjnych technik, metod i strategii** na rzecz realizacji celów ustawodawstwa i polityki UE w zakresie przejścia na zrównoważoną energię odnawialną i zwiększania efektywności energetycznej **oraz zwiększanie bazy wiedzy i wspieranie wdrażania dobrych praktyk**

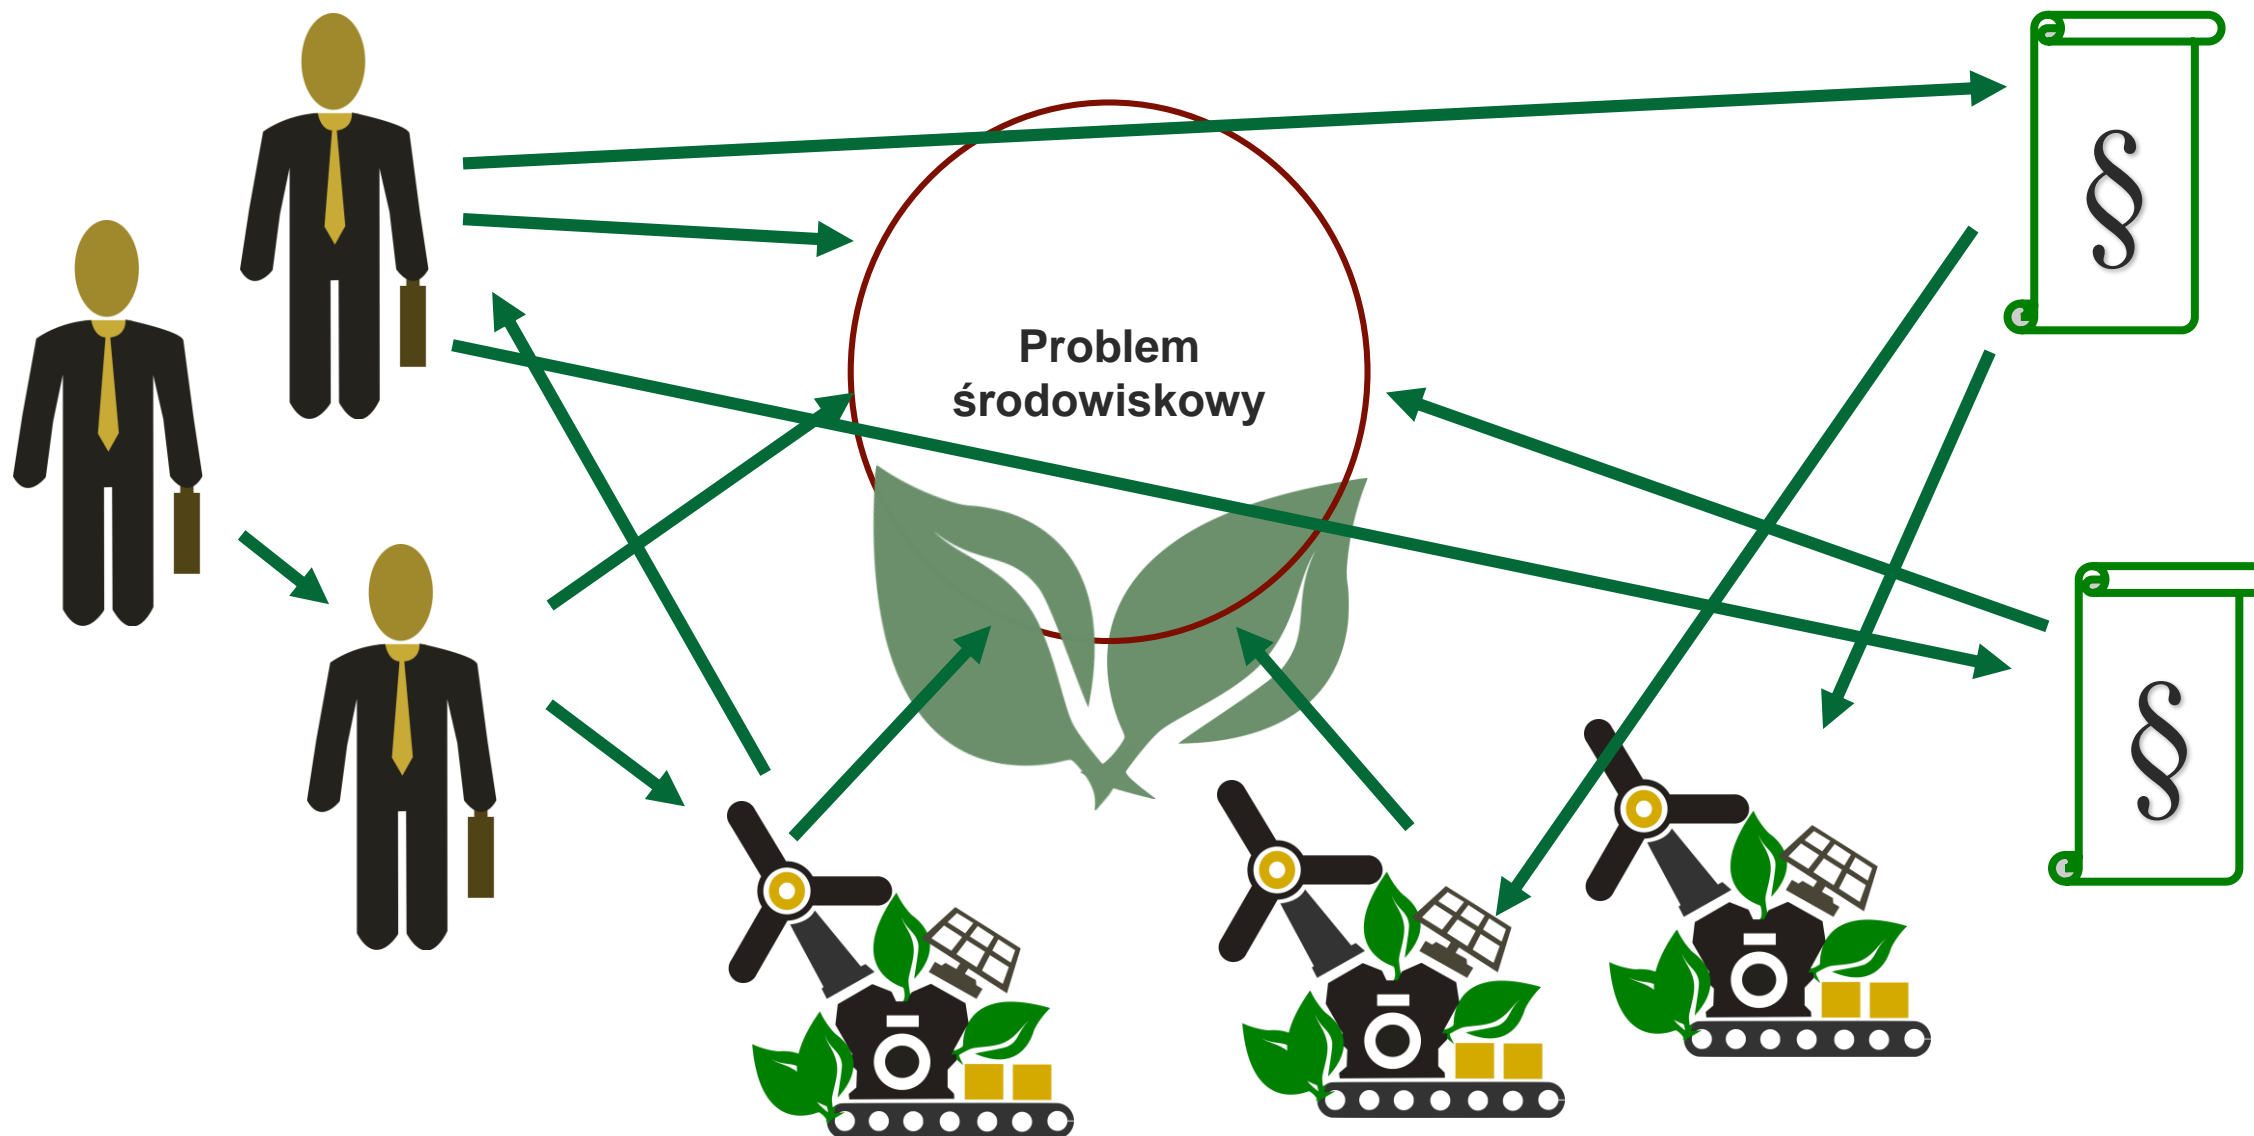

- b) **wspieranie rozwoju, wdrażania, monitorowania i egzekwowania ustawodawstwa UE i polityki** w zakresie przejścia na zrównoważoną energię odnawialną i zwiększania efektywności energetycznej, m.in. poprzez poprawę zarządzania na wszystkich poziomach, w szczególności dzięki zwiększeniu potencjału podmiotów publicznych i prywatnych oraz zaangażowania społeczeństwa obywatelskiego

- c) **pełnienie roli katalizatora we wprowadzaniu na wielką skalę skutecznych rozwiązań technicznych i związanych z polityką UE**, mających na celu wdrażanie ustawodawstwa i polityki UE w zakresie przejścia na zrównoważoną energię odnawialną i zwiększanie efektywności energetycznej poprzez **powielanie wyników, integrowanie powiązanych ze sobą celów w ramach innych obszarów polityki oraz działań sektora publicznego i prywatnego, uruchamianie inwestycji oraz poprawę dostępu do finansowania.**

Tematy priorytetowe

Program LIFE 2021 - 2027

Narodowy Fundusz
Ochrony Środowiska
i Gospodarki Wodnej

Obszar ŚRODOWISKO

Podprogram:
Przyroda i
różnorodność
biologiczna

Podprogram:
Gospodarka o obiegu
zamkniętym
i jakość życia

Obszar KLIMAT

5,432 mld euro

Podprogram:
Łagodzenie zmiany
klimatu i przystosowanie
się do niej

Podprogram:
Przejście na czystą
energię

Cele podprogramu

- Przełamanie barier rynkowych, zmiana warunków rynkowych i podstaw regulacyjnych
- Poprawa zarządzania i zdolności/umiejętności na wszystkich poziomach
- Zmobilizowanie inwestycji i poprawienie dostępu do finansowania
- Innowacyjne podejścia do bezpośredniego wspierania przyjmowania i wdrażania prawodawstwa, celów i inicjatyw UE, z realnym wpływem w terenie.

Obszary interwencji

- **Budowanie krajowych, regionalnych i lokalnych ram prowadzenia polityki wspierającej przejście na czystą energię**
 - 4 tematy priorytetowe
- **Przyspieszenie procesu wprowadzania nowych technologii, cyfryzacji, nowych usług i modeli biznesowych oraz rozwój związanych z nimi umiejętności zawodowych na rynku**
 - 6 tematów priorytetowych

Obszary interwencji

- **Przyciąganie prywatnego finansowania inicjatyw zrównoważonej energii**
 - 3 tematy priorytetowe
- **Wspieranie rozwoju lokalnych i regionalnych projektów inwestycyjnych**
 - 3 tematy priorytetowe
- **Angażowanie i wzmacnianie roli obywateli w przejściu na czystą energię**
 - 2 tematy priorytetowe

The screenshot shows the top part of the European Commission website. At the top left is the European Commission logo. To its right is a language selector set to 'English' and a search bar. Below this is a dark blue navigation bar with the text 'European Climate Infrastructure and Environment Executive Agency'. The navigation menu includes 'Home', 'About us', 'Programmes', 'Funding opportunities', 'Our Projects', 'News & Events', and 'Publications'. The 'Funding opportunities' menu is open, showing 'Calls for proposals' (highlighted with a red box and an orange arrow) and 'Calls for tenders'. Below the navigation is a breadcrumb trail: 'European Commission > CINEA > Programmes >'. The main content area features a 'LIFE Programme' section with a description: 'The LIFE Programme is the EU's funding instrument for the environment and climate action. On 21 May 2022 it turned thirty'. A yellow button below the text says 'LIFE 30th anniversary'. On the right side of the page, there is a large graphic of the '30' anniversary logo.

Description

Commission has launched on 17 May 2022 the LIFE Programme Calls for proposals.

This year, there is €598 million available for nature conservation, environmental protection, climate action, and clean energy transition projects.

You can already find all information and documentation needed at the [Funding & Tenders Portal](#), including the call text and application forms.

Call for proposals
Life Clean Energy Transition
(LIFE-2022-CET)

Version 1.0
16 May 2022

Przejscie na czysta energie

Narodowy Fundusz
Ochrony Środowiska
i Gospodarki Wodnej

Call: LIFE-2022-CET – LIFE Clean Energy Transition

- Action grants benefitting the organisations mentioned in Annex I of the LIFE Regulation
- Additional projects responding to the EU legislative and policy priorities determined following a consultation with Member States (PLP)
- Other specific projects to identified beneficiaries (Article 195 EU Financial Regulation).

Building a national, regional and local policy framework supporting the clean energy transition

[LIFE-2022-CET-LOCAL: Technical support to clean energy transition plans and strategies in municipalities and regions](#)

Objectives

The topic aims to provide local and regional authorities with the necessary capacity to deliver and implement plans and strategies for the clean energy transition. To successfully support the achievement of European energy and climate targets, transition plans and strategies need to be institutionalised, cross-sectoral and tailored to the level of innovation, ambition and specific geographic context of the involved authorities.

Local and regional authorities are a decisive lever for the EU to achieve its 2030 climate and energy targets as set out in the European Climate Law and the relevant 'Fit for 55'⁶ legislative revisions, as well as the carbon neutrality objective by 2050. Policy-makers and administrations at all sub-national levels need to commit to and effectively plan and implement the clean energy transition in their territories at an unprecedented level of ambition and pace with a long-term carbon-neutral horizon. Local and regional authorities also have a very relevant role to play in the framework of the REPowerEU plan⁷ to phase out EU dependence on fossil fuels imports, as the case for a rapid clean energy transition across EU Member States has never been stronger and clearer.

However, in some cases local and regional authorities lack capacities to develop and implement such plans and strategies, including small municipalities, rural and isolated areas and carbon-intensive regions that are lagging behind in the clean energy transition, and have the potential to have a high impact in reducing their fossil fuels consumptions. Many municipalities still need support to design medium and long-term transition plans and strategies, such as Sustainable Energy and Climate Action Plans – SECAPs – or similar. Furthermore, existing plans and strategies need to be aligned to the updated European energy and climate targets and, in turn, deliver more ambitious actions in the short, medium and long term. Therefore, development and reinforcement of skills within local and regional authorities are needed, for instance through training programmes for policy-makers and public officers, which could be tailored to their specific needs; through development of long-lasting knowledge structures; or through replication and rollout of best practices and information tools, etc.

⁶ Communication from the Commission of 14.7.2021 to the European Parliament, the European Council, the European Economic and Social Committee and the Committee of the Regions 'Fit for 55': delivering the EU's 2030 Climate Target on the way to climate neutrality, [COM\(2021\)550 final](#)

⁷ Communication from the Commission to the European Parliament, the European Council, the European Economic and Social Committee and the Committee of the Regions, REPowerEU: Joint European Action for more affordable, secure and sustainable energy [COM\(2022\)108 final](#)

Call: LIFE-2022-CET – LIFE Clean Energy Transition

Another challenge commonly faced by local and regional authorities is the holistic energy planning required to deliver the clean energy transition. A successful and fair clean energy transition requires an integrated approach in planning and implementing the appropriate measures, supported by robust and long-lasting coordination structures and appropriate resources. These elements would lead to mainstreaming the carbon neutrality goal within all relevant sectors (energy production and consumption, buildings, district heating, mobility and transport, land-use, waste, water, health, etc.), mutually reinforcing sectoral policies and improving the efficiency of the planning processes. Moreover, enabling the participation of public and private stakeholders, including citizens and/or communities, would be critical to consolidate a sustained political commitment beyond electoral cycles.

Clean energy transition plans and strategies should reflect high levels of ambition (tailored to the specific geographical, societal or political context) and/or consider the application of innovative elements through local pilots, for instance transition management, carbon budgets, decentralisation of energy production, or green procurement practices. Moreover, they should be fully in line with the energy efficiency first principle; the National Energy and Climate Plans (NECPs); the EU Green Deal and its initiatives such as the Renovation Wave; the transposition of the 'Fit for 55' legislative revisions into national laws – in particular the Recast of the Energy Efficiency Directive, which calls for municipalities to set up local heating and cooling plans⁸; the national Long-Term Renovation Strategies; the European Climate Pact; the Covenant of Mayors; the National Recovery and Resilience Plans and the Regional and National Programmes under the Cohesion Policy Funds; the Horizon Europe mission on climate-neutral and smart cities; the REPowerEU plan to phase out EU dependence on fossil fuels imports, and any other relevant elements of the EU and national climate and energy policy frameworks, in order to contribute to the 2030 and 2050 EU energy and climate targets.

Scope

Proposals should address one or both of the following areas of work:

- Actions should provide support to regional and local authorities and build their capacities to deliver, implement and monitor ambitious short and medium-term clean energy plans and strategies for 2030 – with a potential to pave the way for the 2050 carbon neutrality goal – in coherence with EU and national energy and climate targets and frameworks. Actions should focus at implementing the right mix of activities that will build/increase the technical, legal and social skills among local and regional authorities.
- Actions should aim at institutionalising holistic, integrated and collaborative energy planning in local and regional authorities, seeking approaches that facilitate the integration of clean energy, and thus reduce fossil fuels consumption, with other relevant sectors, supported by relevant coordination structures. The aim is to professionalise and accelerate the planning and implementation processes, and support higher ambition, while enabling and increasing the participation and engagement of all the relevant public and private stakeholders.

The Commission considers that proposals requesting a contribution from the EU of up to EUR 1.5 million would allow the specific objectives to be addressed appropriately.

⁸ Proposal for a Directive of the European Parliament and of the Council on energy efficiency, [COM\(2021\)558 final](#)

Call: LIFE-2022-CET – LIFE Clean Energy Transition

Nonetheless, this does not preclude submission and selection of proposals requesting other amounts.

Expected impact

Proposals should result in providing capacity to local and regional authorities for delivering and implementing plans and strategies for the clean energy transition.

Proposals should quantify their impacts using the indicators listed below, where relevant, as well as other project-specific performance indicators:

- Number of policies/plans/strategies established through the action.
- Number of policy-makers/public officers with improved capacity/skills.
- Number of institutionalised collaborations/exchanges within and beyond public authorities, including peers, private stakeholders and/or civil society.
- Number of public and private stakeholders engaged.
- Secured political commitment and resources.
- Primary energy savings and renewable energy generation triggered by the project (in GWh/year) to be delivered by clean energy transition plans/strategies developed through the action.
- Investments in sustainable energy triggered by the project (cumulative, in million Euro).

These impacts should be demonstrated during the project and within 5 years after the project lifetime.

Funding rate

Other Action Grants (OAGs) – 95%

[LIFE-2022-CET-POLICY: Towards an effective implementation of key legislation in the field of sustainable energy](#)

Objectives

Under the 'Fit for 55' Package to implement the European Green Deal, the Commission proposed a whole set of new measures to revise the main pieces of climate and energy legislation, notably the Energy Efficiency Directive, the Renewable Energy Directive and the Energy Performance of Buildings Directive. The revisions will make the policy framework for sustainable energy more stringent and ambitious. While the legislative framework offers a good amount of flexibility to Member States to design the policy measures according to their needs and framework conditions, accurate monitoring, projecting and evaluation are essential elements of implementation. Importantly, the legislation is strongly interrelated and needs to be implemented and reported in an integrated, consistent way.

With these challenges in mind, the topic aims to support the implementation of the main pieces of legislation in the field of sustainable energy, notably of the Energy Efficiency Directive (Scope A), the Renewable Energy Directive (Scope B) and the Energy Performance of Buildings Directive (Scope C).

Timelines & Restrictions

- Send, receive and confirm maximum two 1:1 meetings requests with CINEA Experts from May 9, 2022 (09:00) to May 27, 2022 (18:00)
- Confirmed meetings with CINEA Experts are scheduled from May 18, 2022 (14:00) to May 31, 2022 (18:00)
- Send, receive and confirm 1:1 meetings requests from May 9, 2022 (09:00) to November 15, 2022 (18:00)
- Confirmed meetings are scheduled from May 18, 2022 (14:00) to November 15, 2022 (18:00)

How to initiate and schedule 1:1 meetings via Video Call?

We propose the following approach:

- Identify promising participants or projects via the Menu **Participants** or **Marketplace**.
- Use the **Send message** button to explore common interests and provide 2-3 date/time suggestions.
- A video call meeting can be scheduled by any of the 2 attendees via the **Meet** button at the previously agreed time. Meeting requests must be confirmed by the recipient.
- All confirmed meetings (video calls) are summarised in the Menu: **Meetings**
