

START ROMAGNA

is the public transport company of the Romagna region, in Italy, managing a fleet of 585 buses and two ferries in the port of Ravenna.

It aims at pursuing a safe and sustainable mobility and at accelerating the energy transition, thus aspiring to invest in less polluting fuels and vehicles.

The organization can be the perfect partner for the implementation of pilot actions and technical trials in mobility projects.

For this reason, **START ROMAGNA** seeks open partnerships and partners willing to collaborate on the topics of sustainable urban mobility, greening urban environments, e-mobility and sustainable fuels in Italy and all across Europe.
