

ARCTICGREEN

**GEOHERMAL ENERGY
FOR
BREATHING CITIES**

50 million m² geothermal district heating capacity

60 cities with AGE's operation

7,500,000 tons of CO₂ saved

4.1 GW_{th} generated in 2019

15 MW_e generated in 2019

>50 patents registered

520 wells drilled

399 heat centrals

The Global Energy Transition & Heat

The Problem

Heating cities with fossil fuels has created massive pollution, environmental damage, and deteriorating public health

The Solution

GeoDH & GeoDC for heating and cooling cities with co-generation from other renewables

The Team to Deliver

Exceptional track record as pioneer in large scale profitable geoDH

GLOBAL
GEOTHERMAL
ALLIANCE
