

NILU – Research capabilities

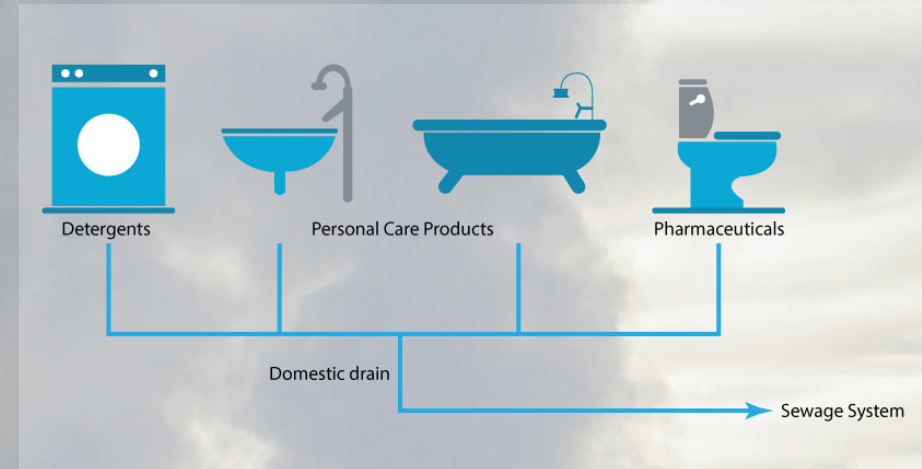

- atmospheric composition
- climate change
- air quality
- hazardous substances in the environment and products
- environmental forensics
- clean technologies
- innovation

1. Turning sewage sludge into a valued raw material

- Source of macro and trace nutrients, recoverable chemicals, *etc.*
- Need WWTP operator, agricultural enterprise,
- Chemical engineers (H₂ generation?)

Stephen Mudge & Pawel Rostkowski

2. Nature-based solution for carbon-neutral cities and improved air quality

- Improves human health and wellbeing,
- Need consortium of citizens, policy makers, urban planners, architects, *etc.*

Hai-Yi Liu
