portal
for clients

Your e-Tax Office

In the e-Tax Office project we aim to integrate our online tax services into one portal and make them **quick, easy, tailored** and **secure**.

Citizens, entrepreneurs, businesses and other clients such as notaries and bailiffs are provided with **the single location** where they can deal with multiple aspects of their tax affairs.

The client journey is mapped and tax services are tailored to individual profiles (relevant facilities are presented in the right time along the journey).

The service is automated, tax declarations prefilled, status visible and confirmed, tax records and history available at hand.

e-PIT Pre-filled Income Tax Returns

Pre-filled Income Tax Returns are available for individuals who do not declare revenues from economic activity and special branches of agricultural production.

The taxpayer's **tax return prefilled by data** collected by the revenue administration is available for a taxpayer in e-Tax Office.

The generated annual tax return is **automatically accepted** on the expiry of submission deadline.

Most popular e-service in the e-Tax Office (10 mln users).
