Using Global Haven Test Results Uploader
Guide for Inbound Travellers to Kenya

The Hardcopy Test Results Uploader is a special feature built in TrustedTravel to enable travellers to directly upload their Test Certificate in order to generate a Travel Code (TC) when travelling from countries where TT codes are not yet being issued by labs. This feature helps persons with hardcopy test results to generate a TC with ease.

The process is powered by the Global Haven Machine Learning Analyser, developed with support from UNDP. Using computer vision algorithms,the system progressively eliminates fakes and forgeries.

Travellers must endeavour to check the test requirements of transit and destination countries on xchange.panabios.org or www.africacdc.org/trusted-travel to ensure that their tests remain valid for the duration of their full trip.

1

Traveller visits trustedtravel.panabios.org to create a TrustedTravel Account with their:

- First Name
- Last Name
- Email Address
- Phone Number
- Password

2

Traveller logs in with the the details used in the account creation via trustedtravel.panabios.org

- Username as the email address
- Password as the password chosen

3

Once your login is successful, you will be sent to the Traveller dashboard with the following menu to your left:

- Trusted Labs
- Tests
- Check In

4
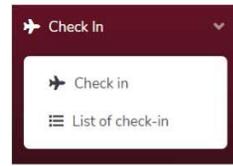

Select **Check in** under Check In to begin TC generation process

5

Select the departure and destination countries and click next to proceed

6
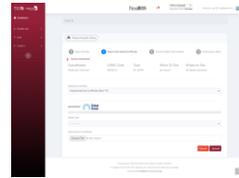

Under selection method:
- select **upload lab test certificate (No TT)**
- select lab which test was taken
- Proceed to upload test results and click upload to proceed

7
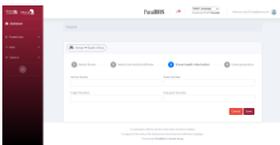

Provide travel details (airline name, seat, flight and passport number) as requested in the form and click on save to proceed to generate a TC

8

A TT code is generated for traveller. The Traveller can copy the TC just above the 2D barcode or Download the code and present on travel when requested

Note that you may be blacklisted from travel to participating countries if you upload fake certificates and the system flags them.
