

Much more than infrastructure: working together to connect research

Crossref/THOR Outreach Meeting, Warsaw

24 April 2017

Digital Humanities Centre at the Institute of Literary Research, Polish Academy of Sciences

[Staszic Palace, Nowy Swiat 72, Warsaw](#)

room 144

Description

This outreach meeting aims to explore how the research community can work together to help connect research and improve discoverability of content - publications, data and more.

Representatives from [Crossref](#) and [Project THOR](#) partners ([ORCID](#), [DataCite](#) and the [British Library](#)) will introduce and provide updates on their initiatives and services (and how they work together). We will also have panelists from Polish institutions join us to discuss how the research landscape looks for them, and how they might work with some of the services discussed.

The day aims to provide a deeper understanding of foundational scholarly infrastructure, but also to have the opportunity to discuss how that can be used in publisher and researcher workflows.

We welcome editors, publishers, librarians, researchers, funders and the wider community to come share their thoughts and ideas. There will be lots of time for discussion and questions, so **please join us and register [here](#).**
