MULTILATERAL DEVELOPMENT CO-OPERATION

The following figures present multilateral assistance granted by Poland in 2022, broken down by type of international organisation and institution/agency receiving the contribution, entity performing the payment and amount spent as of November 10, 2023. The value of multilateral development cooperation was calculated using the methodology and the statistical directives of DAC OECD according to which only contributions to general budgets of international organisations issued on the List of ODA-eligible organisations (updated annually by DAC OECD) were qualified. The remaining payments provided for a certain purpose or an individual country (earmarked contributions) were included under bilateral assistance provided through the multilateral channel. The following OECD FX rates were adopted for the purposes of calculations: 1 USD=4,4577 PLN; 1 USD=0,9509 EUR; 1 USD=0,9547 CHF; 1 USD=1,4418 AUD). Any slight differences in the aggregated amounts presented may result from currency conversions and rounding applied.
